

Export Control – Mission Statement

The success of this company depends in large part on the business we do overseas and while much of this business does not involve licensable products or destinations or end-uses, export controls imposed by the UK Government and the EU can affect a part of our product range.

These controls are intended to limit the supply of technology or strategic goods to countries proscribed, principally for the reasons of proliferation, security or terrorism and where required it is essential that we comply with the legislation. Failure to do so would bring serious penalties for the company and for the individuals concerned.

Your internal contacts with regard to export control matters are:

Overall responsibility: Andrew Simpson (Aerospace Sales)

Assisted by: Mark Hayton (Sales Director)

Eileen Blackwell (Sector Leader – Contract Sales)

It is important that each of us must be aware of our own role and ensure that no items are despatched or traded without due clearance and authorisation, where this is required and if you are in any doubt as to whether a product or destination is subject to export controls, please refer to one of the contacts above.

Thank you for your support in this important aspect of our export business.
